

DENLAR

FIRE PROTECTION

PRE-ENGINEERED RANGE HOODS

THE ORIGINAL.

- Over 6,000 installations nationwide and continuously growing by an average of 28% every year
- NFPA101 2012 & 2015 compliant
 - New health care occupancies
 - Existing health care occupancies
 - New residential board and care occupancies
- Listed to 300A standards

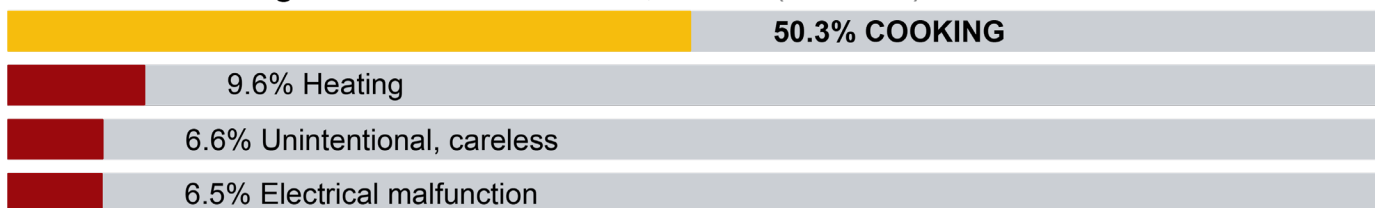

Denlar's fully integrated fire suppression range hood system is centered on the principles of a Type I system and meets all of the requirements of a Type II system and UL300A.

DFP hoods have been protecting limited commercial cooking environments with an economic and proven solution for more than 10 years.

“ They [University of Oklahoma] are so happy with the Denlar hoods they are working to make them the required hood for all housing for the entire university. ”

-Ryan Garton, RLWCO

Residential building fire causes in 2016 364,300 fires (estimated)
