

# OUR PROVEN PROCESS

Purpose

We **raise awareness** of the risks of range-top cooking fires through education campaigns at a local, state, and national level. We lobby for the enforcement of building and fire codes.

01

Advice

Our network of **knowledgeable representatives** will work with you to find the most effective solution for your unique needs.

02

Configure

Denlar's sophisticated systems are easy to configure and specify through a range of out-of-the-box "plug & play" options. **NO onsite fabrication is needed.**

03

Deliver

Denlar's vertically integrated manufacturing process delivers best-in-class **lead times** as well as best-in-class products.

04

Support

We stand by our products with a highly responsive **customer support** department and online training resources.

05

Sustain

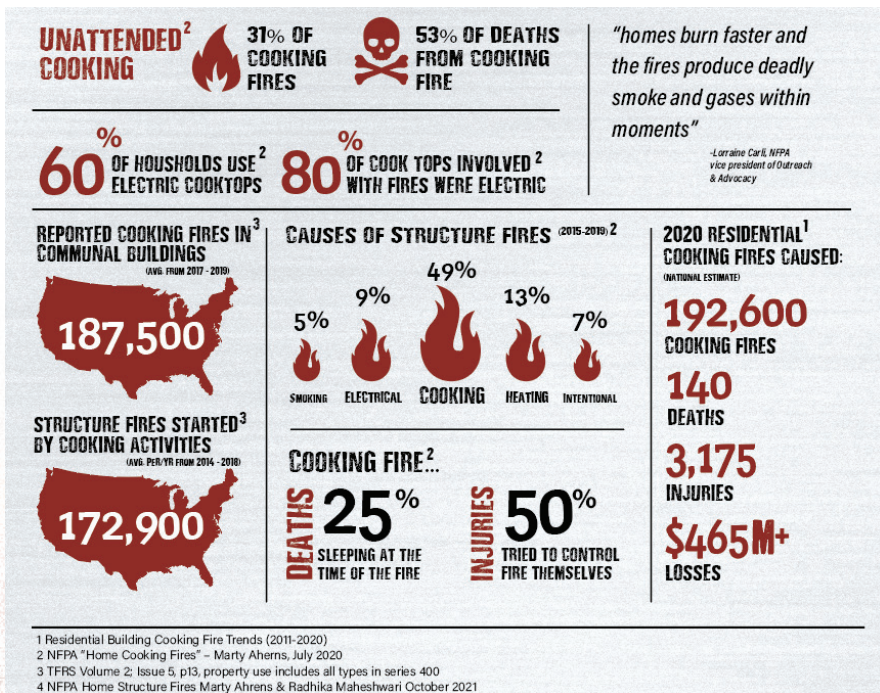

Denlar takes pride in the **sustainable design** of our products. With plug-and-play updates we **future-proof your investment** rather than build in obsolescence.

06

**DENLAR**  
**FIRE PROTECTION**  
PRE-ENGINEERED RANGE HOODS

Manufactured  
in the USA

"homes burn faster and the fires produce deadly smoke and gases within moments"

-Lorraine Carl, NFPA vice president of Outreach & Advocacy

## My Promise To You

"Denlar manufactures a failsafe mechanism that is guaranteed to react to a cooktop or range cooking fire when you can't."

**BRIAN WEINSTEIN,**  
 PRESIDENT  
 DENLAR FIRE PROTECTION

**CONFINED VS NON CONFINED RESIDENTIAL COOKING FIRE LOSSES**

Loss Measured for Residential Building Cooking Fires - 3 Years Average 2017-2019. Losses measured per thousand

	FINANCIAL	DEATHS	INJURIES
<b>CONFINED FIRE:</b>	\$220	0	7.1
<b>NON CONFINED FIRE:</b>	\$19,300	6.3	86.2

## Established in 2007

Denlar Fire Protection engineers, manufactures, and sells **FAIL-SAFE** fire suppression range hoods and control systems.

Our unique mechanism automatically extinguishes unattended cooktop fires; helping save lives and **protect** buildings from the **number one cause of structural fires in the world.**

Our products are designed to protect **residential grade** appliances in limited commercial and non-profit settings where **cooking is not-for-profit.**

## Why is Denlar different?

- Only Denlar provides a **FAIL-SAFE** mechanical mechanism that is not dependent on any power source.
- Denlar's proven solutions are fully integrated and pre-engineered.
  - **NO on-site fabrication**
  - **NO retrofitting**
- Vertical integration with our manufacturing partners provides best-in-class lead times.
- No inbuilt obsolescence. Unlike many companies, Denlar prides itself on **sustainable design.**
